

com.qualoutdoor.recorder.network.Sender

```
classDiagram
    class Sender["com.qualoutdoor.recorder.network.Sender"]
    class FtpFileSender["com.qualoutdoor.recorder.network.FtpFileSender"]
    class HttpFileSender["com.qualoutdoor.recorder.network.HttpFileSender"]
    Sender <|-- FtpFileSender
    Sender <|-- HttpFileSender
```

The diagram illustrates a class hierarchy. At the top is the 'com.qualoutdoor.recorder.network.Sender' class. Below it are two subclasses: 'com.qualoutdoor.recorder.network.FtpFileSender' on the left and 'com.qualoutdoor.recorder.network.HttpFileSender' on the right. A horizontal line connects the two subclasses, with a vertical line and an upward-pointing arrow from the center of this line to the bottom of the 'Sender' class box, indicating inheritance.
