

Fragment

LocationListener

com.qualoutdoor.recorder.map.DataMapFragment

```
classDiagram
    class Fragment
    class LocationListener
    class DataMapFragment["com.qualoutdoor.recorder.map.DataMapFragment"]
    DataMapFragment --|> Fragment
    DataMapFragment --|> LocationListener
```

The diagram illustrates a class hierarchy where `com.qualoutdoor.recorder.map.DataMapFragment` inherits from both `Fragment` and `LocationListener`. This is represented by two upward-pointing arrows originating from the `DataMapFragment` box and pointing to the `Fragment` and `LocationListener` boxes respectively.
